SKILLS

- **Languages:** C, C++, Java and Python
- **Frameworks:** Tensor Flow, Scikit-learn, Xgboost, Numpy, Pandas, HTML AND CSS
- **Tools/Platforms:** VS Code, Google Colab, IntelliJ IDEA
- **Soft Skills:** Problem-Solving, Team Player, Adaptability

PROJECTS

Face Expression Detection using Clustering | [Github](#)

December 2025

- Developed an unsupervised facial expression analysis pipeline leveraging deep learning-based feature extraction and clustering algorithms for emotion grouping without supervision.
- Utilized advanced techniques including CNN-based embeddings, K-Means, DBSCAN, PCA, and t-SNE to enhance clustering accuracy and interpretability.
- Enhanced system scalability and real-time usability by optimizing the model for live camera input and edge deployment.

Solution to Detect and Quantity Riverbank Erosion Using Aerial Imagery | [Github](#)

May 2025

- Developed a geospatial analysis system that automatically detects, maps, and quantifies riverbank erosion using multi-temporal aerial or drone imagery.
- Implemented advanced image-processing pipelines, Trained multiple regression algorithms—including XG Boost, Random Forest, Gradient Boosting, SVR, Ridge, and Lasso—to evaluate performance across diverse model families and identify the most accurate predictor.
- Improved environmental monitoring accuracy by delivering precise erosion metrics—area loss, retreat distance, and hotspot identification—resulting in faster, data-driven decision-making for river management and hazard mitigation.

Crop Recommendation System using Supervised Learning | [Github](#)

November 2024

- Developed a Crop Recommendation System using supervised learning to identify the most suitable crop based on soil nutrients, temperature, humidity, and rainfall, enabling data-driven agricultural decision-making.
- Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-Learn (Logistic Regression, Random Forest, SVM)
- Achieved up to 92% prediction accuracy during model evaluation, improving reliability of crop selection and supporting better agricultural yield planning

CERTIFICATES

- Industrial Training in Machine Learning | **Bharat Skillz** | [Link](#) August 2025
- Cloud Computing | **NPTEL** | [Link](#) April 2025
- Java Programming | **Neo Platform** | [Link](#) May 2024
- HTML And CSS | **Free Code Camp** | [Link](#)

October 2023

ACHIEVEMENTS

- Achieved 4th position among all participating groups and secured a place in the top 5 teams. It is A 32-hour hackathon organized by the institution, focused on building a creative and innovative website. Collaborated as a team to design and develop a functional web application demonstrating originality and technical skills.
- Contributed over 50 volunteer hours in collaboration with an NGO , Dedicated my time to supporting elders at an old age home, assisting with daily activities and providing meaningful companionship.
- Solved 50+ Problems in Leetcode Focusing on DSA ,Strengthening Problem Solving and logical thinking skills

EDUCATION

- [Lovely Professional University](#) Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.1 Since August 2023
- [Sri Chaitanya Junior college](#) Eluru, Andhra Pradesh
Intermediate; Percentage: 92% July 2021 – April 2023
- [Sri Chaitanya Techno School](#) Chintalpudi, Andhra Pradesh
Matriculation; Percentage: 99% July 2020 - March 2021
